Summary

AI & ML engineer with hands-on experience in deep learning, LLMs, multi-agent systems, and large-scale data analysis. Experienced building end-to-end ML pipelines from data preprocessing and feature engineering to model training, evaluation, and deployment. Published GenAI patent co-author. Passionate about applying ML and LLM-based approaches to real-world, business-driven problems.

Education

Symbiosis Institute Of Technology

B.Tech in Artificial Intelligence & Machine Learning

Pune, India

2023 – 2027

Experience

AI Engineering Intern

BridgelT

Mar 2026 – Present

- Applied statistical analysis to model LLM Copilot response quality across large-scale user interaction datasets; identified behavioral patterns to drive data-driven interventions.
- Implemented Explainable AI (XAI) within a LangGraph multi-agent system; developed NLP-based evaluation pipelines to assess model output quality using Python, LangSmith, and W&B.

Virtual Software Development Intern

Gorilla Technology

July 2025

Remote (New Zealand-based)

- Built a Python data pipeline for large-scale enterprise data extraction and transformation; performed SQL-based analysis on structured datasets and delivered actionable findings to stakeholders.

Projects

Agentic Web Test Executor | Dassault Systèmes (ENOVIA) | Python, FastAPI, Playwright [🌐](#)

2026

- Built an agentic test executor that parses structured test prompts, runs Playwright automation, and generates pass/fail reports with failure screenshots and team alerts.
- Implemented FastAPI + Streamlit interfaces, schema-validated test contracts, and modular architecture for parser, executor, reporting, and notification components.

Conversational Assessment Recommender | SHL | Python, FastAPI, RAG, LLM [🌐](#)

- Built a production LLM-powered system that models user dialogue to predict and recommend structured outputs via hybrid retrieval; implemented automated evaluation pipelines (recall + safety probes) and counterfactual fallback strategies.
- Deployed as Dockerized FastAPI service with multi-provider LLM support and schema-strict outputs; demonstrates experience applying LLMs to user intent modeling and behavior prediction.

PolicyPilot: Document Intelligence System | HackRx 6.0 National Hackathon [🌐](#)

Aug 2025

- Designed a RAG pipeline with NLP preprocessing (chunking, embedding, semantic retrieval, re-ranking); formulated and tested hypotheses on retrieval strategy performance — reduced latency 25% (40s → <30s).

Campus Voice: College Discussion Platform [🌐](#)

Jan 2026 – Present

- Built full-stack platform with PostgreSQL for structured user interaction data storage, Supabase Realtime streaming, and backend data flows — generating large-scale user behavior datasets for analysis.

Publications & Patents

Patent Published – Indian Patent Office

Automated Brand Identity Generation using Transformer-Based Processing and Latent Diffusion Architecture [🔗](#)

Co-developed end-to-end generative AI research pipeline: fine-tuned BART transformer for NLP text generation with latent diffusion image synthesis; led dataset curation, feature engineering, model training, and evaluation.

Technical Skills

Languages

Python (pandas, NumPy, scikit-learn), SQL, Java

AI / ML

LLMs, RAG, LangGraph, LangChain, Transformers, NLP, PyTorch

Tools & Infra

FastAPI, Playwright, Docker, Streamlit, PostgreSQL, W&B, LangSmith, Git, REST APIs, CI/CD

Certifications

- [HackerRank SQL \(Advanced\)](#)
- [HackerRank Problem Solving \(Intermediate\)](#)
- [Oracle Cloud Infrastructure 2025 Certified Foundations](#)
- [HackerRank Software Engineer Intern](#)
