[Portfolio](#) — live demos

Summary

AI & ML engineer with hands-on experience in LLMs, RAG, multi-agent systems, and production APIs. Built and deployed live systems spanning conversational AI, document intelligence, revenue recovery, and telemetry-driven classification. Published GenAI patent co-author. Passionate about applying ML to real-world, business-driven problems.

Education

Symbiosis Institute Of Technology
B.Tech in Artificial Intelligence & Machine Learning

Pune, India
2023 – 2027

Experience

AI Engineering Intern
BridgeIT

Mar 2026 – Present

- Applied statistical analysis to LLM Copilot response quality across large-scale user interaction datasets; identified behavioral patterns for data-driven interventions.
- Built LangGraph multi-agent workflows and NLP evaluation pipelines (Python, LangSmith, W&B).

Virtual Software Development Intern
Gorilla Technology

July 2025
Remote (New Zealand-based)

- Built Python ETL pipelines for enterprise data extraction; SQL-based analysis and stakeholder reporting.

Projects

PayRecover | *Razorpay AI Buildathon* | *LangGraph, FastAPI, Groq* [🌐](#) [🔗](#)

- Revenue-recovery agent: diagnose payment failures, policy-gated actions, audit ledger; 50/50 gold-batch classification, 0 policy violations.

Conversational Assessment Recommender | *SHL* | *FastAPI, RAG, LLM* [🌐](#) [🔗](#)

- Production RAG + LLM dialogue system with hybrid retrieval, automated eval (recall + safety), Dockerized multi-provider deployment.

KSPDB Fault Localization | *Propel.ai* | *FastAPI, React, Docker* [🌐](#) [🔗](#)

- Telemetry → located outage tickets on 3,200-pole grid; span/DT/sensor classification with map UI and auto-restoration verification.

PolicyPilot | *HackRx 6.0* | *RAG, FastAPI* [🌐](#) [🔗](#)

- RAG pipeline with semantic retrieval; reduced latency 25% (40s → <30s) via retrieval experiments.

Agentic Web Test Executor | *Dassault Systèmes* | *Python, Playwright* [🔗](#)

- Agentic test executor: structured prompts → Playwright automation → reports and failure alerts.

Campus Voice | *React, PostgreSQL, Supabase* [🌐](#) [🔗](#)

- Full-stack discussion platform with realtime streaming and structured user interaction data.

Publications & Patents

Patent Published – Indian Patent Office

Jan 2026

Automated Brand Identity Generation using Transformer-Based Processing and Latent Diffusion Architecture [🔗](#)

Co-developed generative AI pipeline: fine-tuned BART + latent diffusion; dataset curation, training, and evaluation.

Technical Skills

Languages	Python (pandas, NumPy, scikit-learn), SQL, Java
AI / ML	LLMs, RAG, LangGraph, LangChain, Transformers, NLP, PyTorch
Tools & Infra	FastAPI, Docker, React, PostgreSQL, Playwright, W&B, LangSmith, Git, REST APIs

Certifications

- HackerRank SQL (Advanced)
 - Oracle Cloud Infrastructure 2025 Certified Foundations
- HackerRank Problem Solving (Intermediate)
 - HackerRank Software Engineer Intern
